EDUCATION

The University of Southern Mississippi **Expected May 2027**

Bachelor of Science in Computer Science *Hattiesburg, MS*

Minors in Business Administration (General Business) and Mathematics

- GPA: 3.97
- Relevant Coursework: Data Structures and Algorithms, Software Development, Discrete Mathematics, Secure Software Development, Operating Systems, Probability and Statistics, Database Design
- Honors: President's List (5 semesters), Dean's List (1 semester), Academic Excellence Scholarship

PROFESSIONAL EXPERIENCE

Software Developer **May 2026 – Present**

The Roy Howard Community Journalism Center *Hattiesburg, MS*

- Developed and deployed a cross-platform React Native mobile app (RHCJC News) to the iOS App Store and Google Play Store, managing the full release pipeline including EAS builds, code signing, provisioning profiles, and distribution.
- Built production web features for a journalism platform serving 65,000+ readers across 10 Mississippi counties, improving editorial workflows and reducing manual publishing tasks by over 90%.
- Built a Python pipeline that collects press releases from 10 county sites, multiple city websites, RSS feeds, and an IMAP inbox, formats them and files WordPress drafts.

Full Stack Java Development Intern **Jun 2022 – Sep 2022**

Professional Computer System (P) Ltd. *Kathmandu, Nepal*

- Developed RESTful endpoints for an inventory management system in Java and Spring Boot, working from data model through service and controller layers.
- Built responsive React components for a client-facing web app and wired them to the team's Spring Boot APIs.
- Tuned slow Oracle queries by restructuring joins and adding indexes, cutting several seconds off on high-traffic lookups.

PROJECTS

Premier League Predictive Data | Python, FastAPI, PostgreSQL, SQLAlchemy, pandas, SciPy

- Built a match prediction model over two seasons of Premier League fixture and odds data, producing win/draw/loss probabilities, full scoreline distributions and expected goals for every fixture.
- Validated on 700 held-out matches against professional bookmaker odds, closing 77% of the gap between league averages and the market on Brier score and Ranked Probability Score.
- Designed a versioned data archive against an overwriting upstream source, keying each snapshot by fetch timestamp to eliminate lookahead bias in backtesting.

Pothole Detection | Python, TensorFlow/Keras, scikit-learn, NumPy

- Built a reproducible image classification pipeline over 1,294 road images merged from two public datasets, with MD5 deduplication, stratified splitting, and one-command regeneration of all figures and metrics.
- Benchmarked three models and found transfer learning with a frozen MobileNetV2 backbone beat a from-scratch CNN, lifting accuracy from 87.6% to 96.1% and minority-class F1 from 0.75 to 0.94.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C++, C#, SQL

Frameworks and Libraries: React, React Native, FastAPI, Next.js, pandas, SQLAlchemy, SciPy, Spring Boot, NumPy

Databases: PostgreSQL, Firebase, SQL Server, MySQL, Oracle, SQLite

Tools and Platforms: Git/GitHub, Azure, Docker, WordPress, AWS
